YCUSD Approved A-G Courses

A	History (2 years required) Two years: one year of world or European history, cultures and geography (may be a single yearlong course or two one-semester courses) and one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government.					
	AP Human Geography	World History Str World History AP European History AP World History	U.S. History U.S. History Str AP United States History	American Government Str American Government Honors American Government AP Government and Politics Comparative AP Government and Politics United States		
B	English (4 years required) Four years of college-preparatory English that include frequent writing, from brainstorming to final paper, as well as reading of classic and modern literature. No more than one year of ESL-type courses can be used to meet this requirement.					
	-English 9 Intensive -English 9B -English 9C	-English 10 Intensive -English 10B -English 10C	-English 11B -English 11C -English 11AP English Language and Composition	-English 12B -Advanced Honors English 12 -AP English Literature and Composition	-Career English -English 12 Sports Literature -English 12C (H) Mlt Myths Legends -Introduction to Shakespeare -CSU Expository Reading and Writing	
C	Mathematics (3 years required, 4 years recommended) Three years of college-preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. A geometry course or an integrated math course with a sufficient amount of geometry content must be completed. Approved integrated math courses may be used to fulfill part or all of this requirement, as may math courses taken in the seventh and eighth grades if the high school accepts them as equivalent to its own courses.					
	-Integrated Math 1	-Integrated Math 2	-Integrated Math 3 -Pre-Calculus Honors	-QRAT Math -AP Statistics -AP Calculus AB -AP Calculus BC		
D	Science (2 years required, 3 years recommended) Two years of college-preparatory science, including or integrating topics that provide fundamental knowledge in two of these three subjects: biology, chemistry, or physics. One year of approved interdisciplinary or earth and space sciences coursework can meet one year of the requirement. Computer Science, Engineering, Applied Science courses can be used in area D as an additional science (i.e., third year and beyond).					
	-Biology The Living Earth -Agriculture Biology The Living Earth -Advanced Biology The Living Earth -Advanced Agriculture Biology The Living Earth -Biology 2 -Biology 2 Honors -AP Biology -The Human Body: Applied Biology	-Medical Biology -Forensic Science -Anatomy & Physiology	-Chemistry in the Earth System -Agriculture Chemistry in the Earth System -Advanced Agriculture Chemistry in the Earth System -Honors Chemistry in the Earth System -AP Chemistry -Chemistry in the Community -Biology and Chemistry Research -Advanced Biology & Chemistry Research	-Physics of the Universe -AP Physics 1 -AP Physics 2 -Agriculture Systems Management	-AP Environmental Science -AP Computer Science Principles -Honors PLTW Civil Engineering and Architecture -Honors PLTW Principles of Engineering -PLTW Introduction to Engineering Design -PLTW Aerospace Engineering -PLTW Computer Science Essentials -PLTW Engineering Design and Development	
E	Language other than English (2 years required, 3 years recommended) Two years, or equivalent to the 2nd level of high school instruction, of the same language other than English are required. (Three years/3rd level of high school instruction recommended). Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition and culture. American Sign Language and classical languages, such as Latin and Greek, are acceptable. Courses taken in the seventh and eighth grades may be used to fulfill part or all of this requirement if the high school accepts them as equivalent to its own courses.					
	-German 1 -German 2 -German 3 Honors -German 4	-Punjabi 1 -Punjabi 2 -Punjabi 3 Honors -Punjabi 4	-Spanish 1 -Spanish 2 -Intermediate Spanish 2 (for Sp. Speakers) -Spanish 3 Honors -Spanish 4	-AP Spanish Language & Culture -AP Spanish Literature & Culture -AP French Language & Culture -AP German Language & Culture		
F	Visual and Performing Arts (1 year required) One yearlong course of visual and performing arts chosen from the following disciplines: dance, drama/theater, music, interdisciplinary arts or visual art — or two one-semester courses from the same discipline is also acceptable.					
	-3-D Animation -3-D Art -Beginning Photography -Digital Photography	-Drawing -Beginning Art -Intermediate Art -Fiber Arts. -Jewelry P & D	-AP Studio Art: Drawing -AP Studio Art: 2D -Ceramics -Advanced Ceramics -Digital Art Media	-Musical Theatre 1 -Musical Theatre 2 -Musical Theatre 3 -Musical Theatre 4	-Drama 1 -Drama 2 -Drama 3 -Drama 4	-Mixed Choir -Concert Choir -Music Theory -String Orchestra -Marching/Concert Band
G	Elective Courses (1 year required) One year (two semesters), in addition to those required in "A-F" above, chosen from the following areas: visual and performing arts, history, social science, English, advanced mathematics, laboratory science and language other than English (a third year in the language used for the "E" requirement or two years of another language)					
	-AVID Seminar 11 -AVID Seminar 12 -Child Development	-English 11/12 Creative Writing -Film as Literature -Speech and Debate	-History of Religion -Economics Str -Economics -Honors Economics	-Personal Psychology -Social Psychology	-Animal Science	-Naval Science 2 -Naval Science 3 -Naval Science 4

College/University/Military Admission Requirements

Community College

California community colleges admission includes: California residents possessing a high school diploma or the equivalent. Additionally, California community colleges may admit any nonresident possessing a high school diploma or the equivalent, or anyone (resident or nonresident) over the age of 18 without a high school diploma or the equivalent who, in the judgment of the board, is capable of profiting from the instruction offered.

California State University

California State University – admission requirements include:

1. Grade point average based only on high school A-G subject requirements. (All courses must be passed with a C grade or better.)
2. Test scores on either SAT or ACT (Temporarily Suspended for 2022 and 2023)
3. Required A-G Coursework (See YCUSD Approved A-G Courses)

University of California

Admission requirements include:

1. Grade point average based only on high school A-G subject requirements. (All courses must be passed with a C grade or better.)
2. A grade of “D” in a required high school subject will disqualify an applicant unless he/she has retaken the subject and earned a “C” or better
3. Required A-G Coursework (See YCUSD Approved AG Courses)

Private and Out of State Colleges

Admission requirements are generally similar to the CSU and UC systems. Students should contact the individual institutions to confirm specific requirements.

Military Entrance Requirements

Success in any branch of the Military depends on a good education, and a high school diploma is most desirable. Candidates with a high school equivalency certificate (GED, HiSET, etc...) can enlist, but some Services may limit opportunities. It is very difficult to be considered a serious candidate without either a high school diploma or accepted alternative credential. In any case, staying in school is important for entering the Military. The Armed Services Vocational Aptitude Battery (ASVAB) test is required for all branches. To learn more about joining the military after high school talk to your counselor, contact a recruiter and/or visit todaysmilitary.com for more information.

Specialized Student Programs

Advancement Via Individual Determination (AVID)

The AVID Program is a four-year college preparatory program for underrepresented students who demonstrate academic potential. Offered at all comprehensive high schools, the goals of the program are to provide academic instruction and other support to students to prepare them for four-year college and university eligibility, give students college-level entry skills, and motivate them to pursue a college education. The AVID curriculum consists of seminars offered in notetaking, study skills, time management, test-taking strategies, SAT/ACT and college entrance/placement exam preparation, and effective textbook reading and library research skills. Students receive extensive help in preparing college applications and financial aid forms. Guest speakers from collegiate institutions and the business community also visit the AVID classroom. Additionally, collegiate tutoring is made available to AVID students during the regularly scheduled AVID class. Students must apply to participate in the AVID program through an application which may be obtained by contacting the AVID coordinator at each school site.

Honors/Advanced Placement Courses (AP)

The Advanced Placement (AP) Program is a cooperative educational endeavor of the College Board and high schools. Based on the fact that many young people can complete college-level studies in their secondary schools, it represents a desire of schools and colleges to foster such experiences. Advanced Placement serves three groups: students who wish to pursue college-level studies while still in secondary school, schools that desire to offer these opportunities, and colleges that wish to encourage and recognize such achievement. It does this by providing practical descriptions of college-level courses to interested schools and the results of examinations based on these descriptions to the colleges of the students' choice. Participating colleges, in turn, grant credit and/or appropriate placement to students who have done well on the examinations. Examination fees are charged for each exam. Fee waivers may be available through the AP Coordinator. (Honors classes are available for all students and every student is encouraged to challenge him/herself through enrollment in Honors/AP courses.) An extra grade point is calculated in the college and cumulative GPA for students enrolled in Junior and Senior level Honors and AP courses. An extra point is calculated in the cumulative GPA (YCUSD, not college) for students in freshman and sophomore level honors courses. Students will be notified about the honors/AP application process and timeline during the course registration process. For more information please visit www.collegeboard.com/apstudents.

English Language Development (ELD)

English Language Development (ELD) courses are designed for English Learner (EL) students in grades 9, 10, 11, or 12. ELD courses support ELs in achieving proficiency in English as well as developing critical academic language for success in content courses. English Language Development courses are offered at four levels of language fluency. EL students are placed into the appropriate courses based on the English Language Proficiency Assessment (ELPAC), core assessment results and reading inventory scores. Throughout the year, EL students have the opportunity to change levels based on their progress, teacher recommendation, and parental involvement.

Student ClassLink Single Sign-on

- 1) Go to ycusd.org and select *SINGLE SIGN ON*

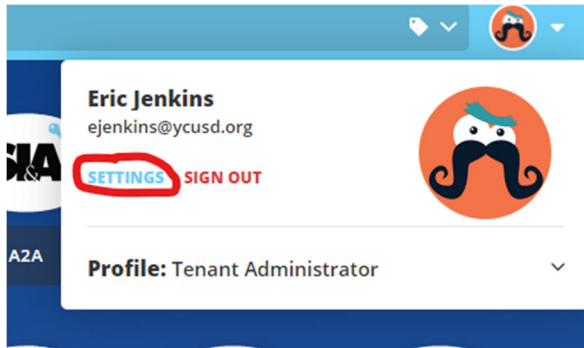

- 2) Sign in using your district ID number and district computer password

A screenshot of the Yuba City Unified School District (YCUSD) login page. The page has a dark blue background. At the top center is the YCUSD logo. Below the logo, the text 'Yuba City Unified SD' is displayed. There are two input fields: 'Username' and 'Password'. Below these fields is a blue 'Sign In' button. Under the 'Sign In' button is a 'Sign in with Google' button, which includes the Google logo. Below the Google button is a link that says 'Help, I forgot my password'. At the bottom, there is a section titled 'Or sign in using:' followed by a circular icon representing a mobile device.

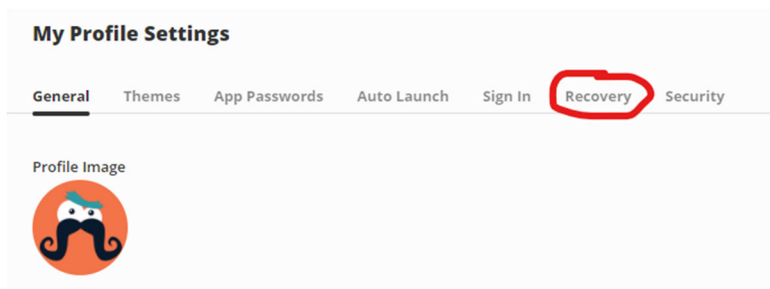

Classlink Password Reset

You can reset your district access password using classlink. This password change will change your password on district owned devices, Classlink, and your district Google account.

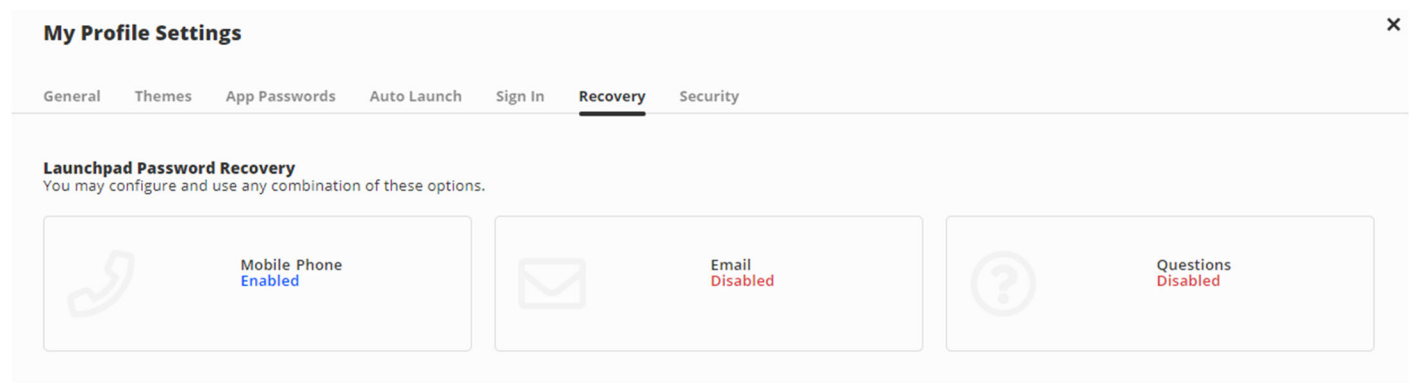

- 1) Login to classlink using the directions above this section
- 2) Select your avatar at the top right of the screen and then select **settings**

- 3) Go to the **Recovery** tab

- 4) Select one of the three recovery options
 - a. Follow the prompts for your options
 - b. Note: that using a phone or email will require validation. You will get a text or email with a code to use for verification.

Aeries Student Portal Login

All YCUSD students have an Aeries Student Portal Account.

WEBSITE:

1. Go to: www.ycUSD.org and under the *Students and Families* Tab select *Parent/Student Portal*

2. Email: Enter your YCUSD issued email address (yourstudentID@learn.ycUSD.org)

Then click 'NEXT'

3. Click "Sign in with Google" and enter your district issued Google credentials (same email and password as you use to sign into a district Chromebook)

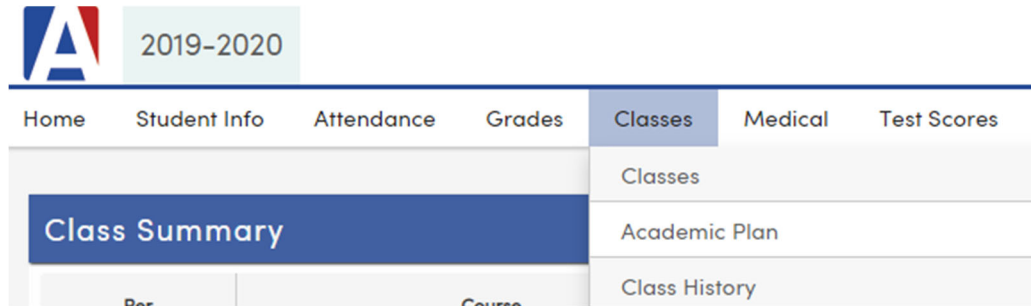

AERIES APP:

1. Download the Aeries App from the App Store or Google Play Store
2. Launch the app and select your school district (Yuba City)
3. Click "Sign in with Google"
4. Enter your district issued Google credentials (same email and password as you use to sign into a district Chromebook)

Academic Plans

The Aeries student portal allows students to create an academic plan. This tool allows students to create a plan and submit it to their counselor. These plans will automatically update completed work and can be modified for the future.

- 1) In the Aeries student portal select the *classes* tab and then select *academic plan*

- 2) Students can add multiple classes at one time using the multi-year button

- 3) Students can add one class at a time using the *Add To Plan* process

A screenshot of the 'Add To Plan' form in the Aeries student portal. It features two dropdown menus. The first is labeled 'Subject:' and has 'All' selected. The second is labeled 'Course:' and has 'None' selected. To the right of these dropdowns is a button labeled 'Add To Plan'.

The revision window is school specific. Please contact your counselor for help with academic plans

Concurrent Enrollment

Concurrent enrollment offers students the ability to attend college courses at Yuba College and receive high school credit. Please note that not all courses at Yuba College count for high school graduation. Please make an appointment with your high school counselor to decide on any college courses and how they may apply to your high school graduation. The steps below will start you on your way.

1. Talk to your high school counselor about the classes you are interested in and how they may apply to high school graduation.
 - a. Get the High School Recommendation Form

2. Apply to Yuba College
 - a. Go to <https://yc.yccd.edu/admissions/new-students/>
 - b. Complete a Yuba College Application
 - i. Create an OpenCCC account and complete the application
 1. You will be given an OpenCCC ID number. **You will not use this on your form**
 - c. Get your Yuba College ID number
 - i. This ID will be emailed to you and will have a letter followed by numbers. You will use this ID on your form
 - d. Complete your High School Recommendation Form and return it to your counselor
 - e. Complete the rest of the steps on the webpage: <https://yc.yccd.edu/admissions/new-students/>

River Valley High School

Lee McPeak, Principal

530-822-2500

rvhs.ycusd.org

River Valley High School was established in 2005. The school was built in response to community growth in part due to an affordable housing market next to a large metropolitan area (Sacramento). The school day at RVHS is structured utilizing a 4x4 block schedule, which allows for substantial periods of time to be dedicated to learning and instruction and less time on routine tasks such as taking roll. Four classes are held each day that are 1.5 hours in length and divided over two terms each school year (fall and spring terms). At the end of each term, students change both classes and teachers, much like college courses.

Kate Mackensen	Counseling Secretary	822-2528	kmackensen@ycusd.org
Carmen Arroyo	RVHS Counselor	822-2523	carroyo@ycusd.org
Lisa Brown	RVHS Counselor	822-2513	lbrown@ycusd.org
Brent Campfield	RVHS Counselor	822-2530	bcampfield@ycusd.org
Jinbae Jung	RVHS Counselor	822-2534	jjung@ycusd.org
Laura Becerra	RVHS Counselor	822-2532	lbecerra@ycusd.org
Amandeep Kaur	RVHS Counselor	822-2527	akaur@ycusd.org

The 4x4 block schedule affords a greater number of options for students, as they are provided an opportunity to take more courses during their four-year high school career than under the traditionally structured six-period school day. This allows students to advance their studies during their high school career and provides more opportunities for all students to explore a multitude of career pathways and/or options for college. Additionally, teachers average 90 student contacts per school day rather than the normal 150, allowing a more personal teaching and learning experience for students and staff.

CAREER GOAL:

Yuba City High School

Cylas Olsen, Principal

530-674-4900

ychs.ycusd.org

Yuba City High School was founded in 1923 and for 83 years was the only Grade 9-12 comprehensive school in the district. In the late 1990's and early 2000's, the school grew to be the largest high school north of Sacramento. In 2004, school enrollment reached nearly 3,000 students. Today, Yuba City High School has 2,000 students, and continues to maintain all of the academic, social, and athletic programs of a large comprehensive high school.

Keyana Mason	YCHS Counselor	Ext. 31121	kmason@ycusd.org
Teresa Russell	YCHS Counselor	Ext. 31124	trussell@ycusd.org

We are very proud that Yuba City High School serves as a hub for many students from neighboring high schools. Over 150 students from various high schools take classes at Yuba City High School in several academic Career and Technical Education (CTE) pathways, such as Law Enforcement, Engineering, Sports Medicine, Digital Photography, Culinary Arts, Early Childhood Careers, Welding, Auto Body Collision Repair and Automotive Technology. Courses such as Early Child Careers and Automotive Technology offer student internships at local businesses.

Career and Technical Education

Course Title: Adv Ag Welding and Fabrication**Course Id:** CA3005**Transcript/Report Card Title:** Ag Weld Fab Adv**CBEDS:** 7122

Adv Ag Welding and Fabrication students will use skills learned in Ag Welding Design I and Ag Welding Design II courses to build a large project. Upon successful completion of the third course in the Agriculture Mechanics pathway, students will: 1) be able to demonstrate knowledge of mechanical properties of welding materials and how welding processes affect those properties. 2) prepare weld joints for producing a product in accordance with print requirements and AWS standards and use proper gas settings, tip sizes, and filler rods. 3) utilize proper fixtures and clamps to minimize undesirable defects as a result of the welding process. 4) know and apply safety procedures in accordance with OSHA guidelines. 5) use a variety of measurement devices to layout a design. 6) safely and efficiently use tools and equipment used in welding processes, such as shears, saws, drills, punch presses, benders, flame cutters, grinders, gas settings, tip sizes and filler rod. Integrated throughout the course are career preparation standards, which include basic academic skills, communication, interpersonal skills, problem solving, workplace safety, technology, and employment literacy.

Other course information: Prerequisites: Ag Welding and Fabrication 2. Graduation Requirements Met: Elective Credit

CSU/UC a-g requirements met: No

NCAA eligibility requirements met: No

Course Title: Adv Video Production**Course Id:** CF5617**Transcript/Report Card Title:** Adv Video Prod**CBEDS:** 7245

Adv Video Production is a Project-Based course focusing on the use of current industry software [ex. Adobe Premiere Pro] in digital video editing and production. Units will be designed around the creation of projects for students to design, build, create, or perform. This course will examine specific uses of film and video technology in various entertainment and industry sectors. Students receive advanced training in pre and post production jobs and competencies, current and emerging technologies, and the collaborative nature of the creative process involved in video production. Video Production is the capstone course for the Film/Video Production Pathway. The complete comprehensive multimedia design training is a three-course pathway sequence which includes Digital Art Media, Video Composition, and Advanced Video Production.

Other course information: Prerequisites: Video Composition and Production. Graduation requirements met: General elective requirement.

CSU/UC a-g requirements met: No

NCAA eligibility requirements met: No

Course Title: Adv. Automotive Technology**Course Id:** CI7203**Transcript/Report Card Title:** Auto Tech**CBEDS:** 8532

Adv. Automotive Technology is a course designed for general and college prep students in grades 11 or 12 who want to complete the entry level requirements for well-paying careers in automobile mechanics and service. Students will engage in learning and practicing the principles, processes and techniques of car maintenance and repair. Students will learn about suspension systems, brakes, engine overhaul, electrical systems, computerized fuel, ignition, and engine management systems, and the diagnostic techniques necessary to maintain and repair today's cars. Students will engage in the hands-on, applied learning of testing equipment, tools, auto computer systems, safe shop practices, teamwork, and many tricks of the trade for home and professional car maintenance and repair. Students who perform successfully will receive a Certificate of Proficiency and will be able to continue into more advanced professional auto mechanics courses.

Other course information: Prerequisites: Students must complete a required safety unit and safety test. Graduation requirements met: Third-year science requirement.

CSU/UC a-g requirements met: No

NCAA eligibility requirements met: No

Course Title: Advanced Culinary Arts**Course Id:** CS5335**Transcript/Report Card Title:** Adv Cul Art**CBEDS:** 8021

Advanced Culinary Arts is a comprehensive course designed to provide students with the knowledge of producing, processing, preparing, and evaluating food. Students will further develop professional culinary skills introduced in Culinary Arts I by participating in a number of hands-on lab activities. Continued emphasis will be placed on reading recipes, measuring ingredients accurately, and more complex food preparation. Food science principles, kitchen safety and sanitation, proper use of equipment, and essential job skills in the food industry will be reinforced as well.

Other course information: Prerequisites: Introduction to Culinary Arts. Graduation requirements met: Third-year science requirement.

CSU/UC a-g requirements met: No

NCAA eligibility requirements met: No

Course Title: Advanced Digital Photo**Course Id:** CF6006**Transcript/Report Card Title:** AdvDigitalPhoto**CBEDS:** 7218

Advanced Digital Photo is a course designed for general and college prep students in grades 11 or 12. This course will engage students in learning the advanced professional principles, processes and techniques of digital photography. Students will design, plan and create digital photography projects that will utilize advanced techniques with the digital cameras, lighting, photographic composition, and computer editing software. Students will continue to study digital photography as an art form and will learn and apply professional techniques of problem-solving in conceiving, creating and communicating concepts of visual artistic expression. Prerequisites: Satisfactory completion of Digital Photography.

Other course information: Prerequisites: Satisfactory completion of Digital Photography. Graduation requirements met: Visual and Performing Arts.

CSU/UC a-g requirements met: No

NCAA eligibility requirements met: No

Course Title:	Advanced Floral Design	Course Id:	CA3106
Transcript/Report Card Title:	Adv Floral	CBEDS:	7165

Advanced Floral Design allows students to learn professional florist skills for employment in the floral field. Students will explore the floriculture industry on a more technical and advanced level including the proper care and handling of flowers, plants, and foliage; evaluate floral materials and arrangements; utilize floral tools, supplies and products to apply design principles to floral medium; construct arrangements for all occasions; display, price, and market floral designs; and preserve floral materials as students run their own floral shop. Students will be primary members in the floral shop and produce and market arrangements and decorations for events on campus and off campus. Students will be actively involved in the budgeting and cost analysis of arrangements and event planning. The art elements and principles of design will serve as a foundation for each unit covered. After completion of this class, students will be prepared to secure a job in the floral industry. Students will be exposed to careers in Agriculture Business. Students will automatically become members of FFA.

Course Title:	Advanced Photography	Course Id:	CF5707
Transcript/Report Card Title:	Adv Photo	CBEDS:	7218

Advanced Photography is a course designed for general and college prep students in grades 11 or 12. This course will engage students in learning the advanced professional-level principles, processes and techniques for careers in photography. Students may create applied, hands-on photography projects designed for the applied use of 35 mm and digital cameras, computer photo applications, studio lighting, color photography, development of film and prints, and photographic art presentations. Students will learn and apply advanced principles and processes of creative photographic design, still life and portraiture techniques will be refined and advanced techniques of photographic presentation. Students will expand their work in medium and large format photography with additional lab time and more instructor contact.

Other course information: Prerequisites: Satisfactory completion of Beginning Photography and/or Applied Photography with a grade of C or better or teacher recommendation. Graduation requirements met: Visual and Performing Arts.

Course Title:	Advanced Welding Technology	Course Id:	CI6808
Transcript/Report Card Title:	WeldingTech	CBEDS:	8231

Advanced Welding Technology is a one-term course designed for general and college prep students in grades 10, 11 or 12 who want to complete more advanced requirements for a career in welding and metals fabrication. Students will engage in learning and practicing more advanced principles, processes and techniques of "stick", "MIG", "TIG", and gas welding and will perform cutting practices using gas and plasma-arc techniques. Students will engage in the hands-on construction of complex and creative welding and metals fabrication projects using shop drawings, layout work and advanced fabrication skills. Students may also build their own personal projects. High-quality welders and metals fabricators are in high demand in many industrial, engineering and construction careers and they earn excellent salaries and benefits. Students who perform successfully will receive a Certificate of Proficiency and will be able to enter into professional welding and metals fabrication courses and training programs.

Other course information: Prerequisites: Students must complete a required safety unit and safety test. Graduation requirements met: Third-year science requirement.

Course Title: Ag Welding and Fabrication 1

Transcript/Report Card Title: Ag Weld Fab 1

Course Id: CA1005

CBEDS: 7120

Ag Welding and Fabrication 1 is an academically challenging course that integrates mathematics, science, writing and mechanics. Specific units include: Using the Ag Mechanics Shop, Measurement, Project Planning, Electricity and Electronics, Plumbing Systems and Water Use, Concrete and Masonry, Arc Welding, Power Mechanics, and Careers. Students will focus on understanding theory of the preceding areas, as well as mastery of application of these theories. Students will exceed core academic knowledge and demonstrate critical thinking skills as they apply their knowledge to projects, real-life scenarios, and case studies. Students will perform advanced research in various fields. A variety of resources will be accessed (Internet, professional journals, books, and industry professionals) for the purpose of creating written and oral presentations that demonstrate students' knowledge and ability. Units covered in this course will build upon existing knowledge where applicable. End of unit projects will incorporate, at minimum, the knowledge acquired from at least one other previously covered unit. For example, students will learn about the properties of water in Unit 5, then utilize that understanding when they look at how water plays a role in the hydration of concrete in Unit 6. Throughout the course, students will be graded on participation in intracurricular FFA activities as well as the development and maintenance of an ongoing Supervised Agricultural Experience (SAE) program.

Other course information: Prerequisites: None. Graduation Requirements Met: Elective Credits

Course Title: Ag Welding and Fabrication 2

Transcript/Report Card Title: Ag Weld Fab 2

Course Id: CA2005

CBEDS: 7121

Ag Welding and Fabrication 2 will include oxyacetylene welding (OAW), oxyacetylene cutting (OFC-A) and shielded metal arc welding (SMAW) processes, in the flat and horizontal positions on various joint details. It will also include safety procedures, electrode identification, joint fit-up and alignment, base metal preparation, weld quality, beads and fillet welds, with focus on theory and practice. All welds will meet the American Welding Society (AWS) qualification standards. Throughout the course, students will be graded on participation in intracurricular FFA activities as well as the development and maintenance of an ongoing Supervised Agricultural Experience (SAE) program.

Other course information: Prerequisites: Ag Welding and Fabrication 1. Graduation Requirements Met: Elective Credit

Transcript/Report Card Title: Animal Science

Course Id: CS2105

CBEDS: 7141

Animal Science is a course designed for general and college prep students in grades 9, 10, 11 or 12. This course will engage students in learning the practical aspects of Animal Science, especially as they pertain to livestock anatomy, physiology, reproduction, nutrition and common animal diseases and health conditions. Students will apply their knowledge and skills to the practical care of livestock and small animals. Students are encouraged to work with their own animals but having an animal is not a course requirement. Students will also learn the fundamentals of livestock supply and livestock services businesses.

Course Title:	AP Computer Science Principles	Course Id:	CB6227
Transcript/Report Card Title:	AP CompSci Pr	CBEDS:	8132
AP Computer Science Principles (CSP) is a PLTW course to implement the College Board's new AP CS Principles framework. Students work in teams to develop computational thinking and solve problems. The course does not aim to teach mastery of a single programming language but aims instead to develop computational thinking, to generate excitement about the field of computing, and to introduce computational tools that foster creativity. The course also aims to build students' awareness of the tremendous demand for computer specialists and for professionals in all fields who have computational skills. Each unit focuses on one or more computationally intensive career paths. The course also aims to engage students to consider issues raised by the present and future societal impact of computing.

Course Title:	Architectural Design	Course Id:	CI6906
Transcript/Report Card Title:	Arch Design	CBEDS:	7711
Architectural Design is a course designed for general and college prep students in grades 11 or 12 who want to complete more advanced skills for careers in architecture with the new industry standards of Sustainable Design and Universal Design. Students will engage in learning and practicing the principles, processes and techniques of sustainable and universal design including work with analyzing, sketching, refining, plotting and presenting architectural design drawings to "clients." Students will work with traditional architectural drafting equipment and Computer Assisted Drafting software to create plans and renderings, including work with Chief Architect® and AutoCAD® software applications. Students will visit local and regional building sites, meet with professional architects, and work with real blueprints and construction documents. Students will be well informed on the realities and requirements for careers in architecture including aesthetics, Title 24 lighting, ADA compliance, USCBC-LEED certification, bidding, marketing, client relations and service, and business management.			
Other course information: Prerequisites: Satisfactory completion of Computer Applications, other advanced computer courses, other IE courses or other art courses with a grade of C or better or instructor recommendation. Students must complete a required safety unit and safety test. Graduation requirements met: Fine Arts and Third-year science.

Architecture 1 is a course designed for general and college prep students in grades 9, 10, 11 or 12 who want to complete the entry level skills for careers in engineering and architecture. Students will explore a pathway of personal discovery to unlock and develop their innate creative talents in architectural design. Students will learn the history of architecture and the professional requirements of the architecture career field. Students will also engage in learning and practicing the principles, processes and techniques in using drafting and design work. Students will learn line weights, lettering, dimensioning, and other drafting techniques as well as the use of Computer Assisted Drafting (CAD) to produce architectural design drawings. Students enrolled in other courses such as Wood Technology, Electronics, etc., will find the skills learned in Mechanical Drawing can be put to use doing drawings for these classes.

Transcript/Report Card Title:	Auto Mechanics	CBEDS:	8530
Auto Mechanics is a course designed for general and college prep students who want to learn how all automobiles work along with basic auto service operations to keep vehicles running right. Students will complete the entry level requirements for a potential career in automotive mechanics and technology by practicing the principles, processes and techniques of automotive maintenance and repair. Students will learn various aspects of how cars work (all of the mechanical systems - engines, brakes, suspension, electrical, ignition, tires and wheels, etc.) as well as the fundamental operations of auto maintenance and repair. Students will engage in hands-on, applied learning of testing equipment, tools, auto computer systems, safe shop practices, teamwork, and professional car maintenance and repair. Students will also be introduced to new car dealership operations and the broad range of career opportunities in the automotive industry. Students will also learn how to keep their own cars powered up and operating in tip-top condition, how to save money by doing their own maintenance and repairs, and how to avoid rip-off service costs.

Transcript/Report Card Title:	Business Acct	CBEDS:	7422

Business Accounting is a course designed for general and college prep students in grades 10, 11 or 12. This course will engage students in learning the accounting skills and processes used in most American small business and many large corporations. Students will learn and apply the principles and processes of the basic accounting cycle for their own personal finance uses, for a sole proprietor service business and a retail business using two accounting simulations and various computer software exercises. This course will prepare students for business majors in college and for direct entry into the workforce in business careers. Students will learn business ethics, job search skills, business communications skills, and job retention skills such as good attendance, punctuality, proper personal grooming, and positive attitudes. Students who have completed one year of Accounting will also benefit from this course. This course may be offered as a regular on-campus course (CB2001) or as an ROP course (CB8601).

Transcript/Report Card Title:	Career Expl/Inv	CBEDS:	7000

Career Exploration and Investigation course introduces students to a variety of sectors and/or pathways, allowing them to make a more confident decision about which career pathway to pursue. The course includes 15 career modules. Students will complete 7 to 8 modules in one term. Each module will engage students in real world problem-based learning activities. Through these activities, students will explore their interests and aptitudes. Students will also be introduced to Virtual Job Shadow to complete career exploration activities. Students will complete self-inventory activities to examine career interests and skills and create short term and long term career plans. Integrated throughout the program are career preparation standards that include basic academic skills, interpersonal skills, problem solving, safety, and technology. Nurse Assistant - Certified prepares students to take the State Competency Exam required for certification.

CBEDS: 9500

Exploratory Work Experience is a course designed for general and college prep students in grades 11 or 12. This course will engage students in the application of required career and college skills in workplace settings with local and regional businesses. Students will be expected to use real-world knowledge and skills in decision-making, communication, problem-solving, people skills, customer service, teamwork and other skills required for success in any job or career. Weekly classes will focus on workplace issues like getting a promotion, designing and building an employment portfolio, completing a successful job interview, etc. Students will receive written evaluations and letters of recommendation from the instructors based upon the type of job or jobs that they hold. Special course requirements: Students who enroll in Work Experience must comply with ALL of the following course requirements; failure to meet these requirements may result in removal from the course, failing grades and loss of credits. All students enrolled in Work Experience must: A)Have a paid job where learning is taking place. B)Maintain at least a 2.0 GPA and adhere to school attendance requirements for graduation. C)Be covered by Worker's Compensation and Social Security. D)Be employed by a business which is in compliance with all State and Federal Laws relating to employment of minors. E)Have written agreements between parent, student employee and school ON FILE in the Work Experience Office at their school. F)Attend the required Work Experience instruction class at their school once each week.

Int Video Game Design is an intermediate level course in game design and development that engages students in a real life game development company. Throughout the course students act as a game development company to craft a game. In addition, students build 3 guided games that build on some of the functionality required in their own unique team game. Intermediate Video Game Design is more than just building games, it is about building a foundation for further advancement.			
Other course information: Prerequisites: Successful completion of Video Game Design and Integrated I. Graduation requirements met: Elective credit.

Career and Technical Education

Course Title: Intro to Engineering Design
Transcript/Report Card Title: IED

Course Id: CI5603
CBEDS: 7700

Intro to Engineering Design is an introductory course designed for general and college prep students in grades 9 or 10 who want to dig deep into the engineering design process, and into applying math, science, and engineering standards to hands-on projects. Students will work both individually and in teams to design solutions to a variety of problems using 3D modeling software. The major focus of the IED course is to expose students to the design process, design ethics, research and analysis, teamwork, professional communication and collaboration methods, global and human impacts, engineering standards and technical documentation. IED gives students the opportunity to develop skills in research and analysis, teamwork, technical writing, engineering graphics, and problem solving through activity-, project-, and problem-based (APPB) learning. As the course progresses and the complexity of the design problems increase students will learn more advanced computer modeling skills as they become more independent in their learning, more professional in their collaboration and communication, and more experienced in problem solving. IED is one of the foundation courses in the Project Lead The Way high school pre-engineering program.

Other course information: Prerequisites: None. Students should be concurrently enrolled in college preparatory mathematics and science courses to facilitate the use of knowledge from these courses in IED applications. Graduation requirements met: Third Year Science.

Course Title: Introduction to Culinary Arts
Transcript/Report Card Title: Intro Cul Art

Course Id: CS5325
CBEDS: 8020

Introduction to Culinary Arts is a course where students will relate the concepts of human nutrition, diet and exercise to health and fitness. Students will also be responsible for learning scientific concepts and principles as they relate to the food industry and the human body. A practical and hands-on approach to learning will be performed as students prepare foods from a variety of countries to compare cuisines, ingredients, and preferred cooking methods. One of the main objectives in this course is to have students understand the food industry, food preparation in their daily lives, nutrition science and the potential for future employment.

Other course information: Prerequisites: None. Graduation requirements met: Third year science requirement.

Course Title: Landscape Management
Transcript/Report Card Title: Landscape Mgt

Course Id: CA3205
CBEDS: 7161

Landscape Management Students will learn how to grow and manage a variety of traditional landscaping plants. Students will use the greenhouse area to have a test plot for grass, shrubs and flowering plants. Students will learn how to properly and safely operate the equipment associated with landscaping. The class will learn the proper way to design and manage landscaping for a variety of areas. Students will be responsible for the designing and executing landscaping on campus. Students will have the opportunity to design and execute landscaping at other schools and businesses in Yuba City. Students will be exposed to careers in Agriculture Business. Students will automatically become members of FFA.

Other course information: Prerequisites: Introductory Ag courses (level 1 and 2) and Greenhouse/Plant Management. Graduation Requirements Met: Elective Credits

Course Title: Law Enforcement 1
Transcript/Report Card Title: Law Enf 1

Course Id: CN5855
CBEDS: 8411

Law Enforcement 1 is an introductory course designed for general and college prep students in grades 11 or 12 who want to learn about the criminal justice system and jobs in that system. This course is offered as a one semester/one quarter course and as a one term/one year course. Students will be engaged in learning the principles, processes and practices in law enforcement work: Community oriented policing, community relations, the processes and functions of the court system, and the processes, functions and practices of traffic law and criminal law enforcement. Students will learn and use applied knowledge in the following areas of law enforcement: Domestic violence, narcotics investigations, traffic enforcement, etc. and will understand how law enforcement in these areas impacts society in general and their communities. Students will also learn some of the tools used by police officers and the legal aspects of the use of force. Students will explore and learn about the types of careers available in the areas of criminal justice, judicial, corrections or other related fields.

Other course information: Prerequisites: None. Graduation requirements met: Elective credit.

Transcript/Report Card Title:	Naval Sci 4	CBEDS:	9373

Naval Science 4 is the fourth-year capstone course focuses primarily on practical leadership techniques and implementation. The intent is to assist seniors in understanding leadership and improving their leadership skills by putting them in positions of leadership, then helping them analyze the reasons for their varying degrees of success throughout the year. The course content includes instruction in theoretical and applied aspects of leadership, training, and evaluation of performance. Students become aware of the techniques used to create motivation, develop goals and actions for a work group, and learn proper ways to set a leadership example. Classroom activities include seminars, reading assignments, classroom presentations, and practical work with younger cadets. Effective communication, leadership in action, and demonstrating Navy customs and courtesies are also part of the content covered by the course.

Course Title:	Nurse Assistant 1	Course Id:	CN8377
Transcript/Report Card Title:	Nurse Asst 1	CBEDS:	7941

Nurse Assistant 1 prepares students for certification as a CNA by the State of California as an entry-level worker on a health care team in a long term care facility. This course follows the 2018 CDPH approved Nurse Assistant Training & Assessment Program (NATAP) Module Curriculum which includes 17 Modules of theory instruction and clinical hours. Modules 1 through 9 are covered in the Nurse Assistant 1 course. The Nurse Assistant 1 course includes 49 hours of clinical experience at a long-term care facility. The CNA program also includes instruction and certification by the American Heart Association in Basic Life Support for healthcare professionals (CPR and First Aide). The course is conducted in a classroom and at a community training site (long term and intermediate care facilities). Completion of this course is a requirement for admission into Nurse Assistant 2. Integrated throughout the program are career preparation standards that include basic academic skills, interpersonal skills, problem solving, safety, and technology. Nurse Assistant - Certified prepares students to take the State Competency Exam required for certification.

Course Title:	Principles of Engineering (H)	Course Id:	CI5613
Transcript/Report Card Title:	POE (H)	CBEDS:	7730

Principles of Engineering (H) is a course designed for general and college prep students in grades 9, 10 or 11 who want to fully understand the major principles that drive all work in engineering. Students will work both individually and in teams to apply the major principles of engineering to a variety of problems using 3D modeling software. The major focus of the Principles of Engineering course is to engage students in learning the major principles of engineering: Energy and Power, Materials and Structures, Control Systems, and Statistics and Kinematics. Principles of Engineering gives students the opportunity to develop skills in research and analysis, teamwork, technical writing, engineering graphics, and problem solving through activity-, project-, and problem-based (APPB) learning. As the course progresses and the complexity of the design problems increase students will learn more advanced computer modeling skills as they become more independent in their learning, more professional in their collaboration and communication, and more experienced in problem solving. Principles of Engineering is the second course in a sequence of courses in the Project Lead The Way high school pre-engineering program.

Other course information: Prerequisites: Completion of Introduction to Engineering Design with a grade C or better or teacher recommendation. Students should be concurrently enrolled in college preparatory mathematics and science courses to facilitate the use of knowledge from these courses in POE applications. Sm Bus Ownrshp & Mgmt is a course designed for general and college prep students in grades 11 or 12 and it may be offered as a one-hour course or a two-hour course. This course will engage students in setting up and operating virtual businesses that realistically simulate the operations of real businesses with the assistance and guidance of representatives from local and regional business partners. Students will design and create their own businesses including products and services, management structures and processes, and business operations. Students will sell their goods and services to a network of over 3500 different schools throughout the world, and they will participate in trade shows and other exciting competitive events. Students will use current business and communications software and the Internet for business transactions. Students will work in a realistic business environment with operational departments (task-oriented teams) in human resources, advertising, marketing, sales, accounting, technology, and public relations. Students will earn virtual paychecks, spend their personal virtual monies and pay virtual taxes using appropriate personal financial strategies and processes. They will learn skills and practices necessary for success in the professional business world or higher education.

Course Title:	Small Engine Repair	Course Id:	CI5705
Transcript/Report Card Title:	Sm Eng Repair	CBEDS:	7000

Small Engine Repair is a course designed for general and college prep students in grades 9, 10, 11 or 12 who want to complete the entry level requirements for a potential career in engine mechanics and technology. Students will engage in learning and practicing the principles, processes and techniques of maintenance and repair on lawn mowers, garden equipment, chain saws and other equipment powered by small engines. Students will learn every aspect of how small engines work and the fundamental operations of small engine maintenance and repair by working to disassemble, measure and test, and reassemble working small engines. Students will engage in the hands-on, applied learning of testing equipment, tools, safe shop practices, teamwork, and many tricks of the trade for home and professional small engine equipment maintenance and repair.

Other course information: Prerequisites: None. This course is a must for those students who are considering a career in the vocational and technical service industries or students who want to start their own equipment repair business. Students must complete a required safety unit and safety test. Graduation requirements met: Third-year science requirement.

Sports Medicine is a course designed for general and college prep students in grades 10, 11 or 12. This course will engage students in learning the principles, processes, skills and techniques in Human Anatomy and Exercise Physiology as they relate to athletic conditioning, injuries, and the treatment of injuries and body conditions related to sports performance. Students will investigate methods and protocols for addressing sports related injuries and conditions with a larger contextual study of Genetics, Human Body Structures and Systems, Disease Prevention, Physical Fitness, and Medical Research. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in Human Anatomy and Physiology. Students will be engaged in learning, applying and the mastering the scientific method, laboratory operations and safety, and practical medical treatment information and skills that are used in everyday life. Students may complete an externship within the healthcare or fitness industry. Students will be fully engaged in learning and mastering the California State content standards in Science (district-adopted core content standards).

Transcript/Report Card Title:	Vid Game Des	CBEDS:	7260

Video Game Design will focus on the development and application of STEM skills and reinforce technical reading and writing competencies within the Video Game Industry. This course will introduce students to the Video Game Design Industry and the basic components and processes required to produce an interactive video game for market. Students will be introduced to basic game design concepts such as strategy, sound, color schemes, interaction, graphics, and the role they play in designing a "good game". They will also learn to apply the problem-solving design cycle to the process of game development which will be reinforced through the Standards for Mathematical Practice, Next Generation Science Standards, and Standards for Career Ready Practice. Students will begin with drag-and-drop actions using Game Maker, and progress to more advanced programming concepts. Ultimately students will learn to work as part of a game design team to develop an original game and create a marketing plan for their new game. Game Design will fall in the "Introduction to Computer Programming" model in the information technology industry sector and programming pathway

Transcript/Report Card Title:	Work Experience	CBEDS:	9501

Work Experience is a course designed for general and college prep students in grades 11 or 12. This course will engage students in the application of required career and college skills in workplace settings with local and regional businesses. Students will be expected to use real-world knowledge and skills in decision-making, communication, problem-solving, people skills, customer service, teamwork and other skills required for success in any job or career. Weekly classes will focus on workplace issues like getting a promotion, designing and building an employment portfolio, completing a successful job interview, etc. Students will receive written evaluations and letters of recommendation from the instructors based upon the type of job or jobs that they hold. Special course requirements: Students who enroll in Work Experience must comply with ALL of the following course requirements; failure to meet these requirements may result in removal from the course, failing grades and loss of credits. All students enrolled in Work Experience must: A)Have a paid job where learning is taking place. B)Maintain at least a 2.0 GPA and adhere to school attendance requirements for graduation. C)Be covered by Worker's Compensation and Social Security. D)Be employed by a business which is in compliance with all State and Federal Laws relating to employment of minors. E)Have written agreements between parent, student employee and school ON FILE in the Work Experience Office at their school. F)Attend the required Work Experience instruction class at their school once each week.

Other course information: Prerequisites: Fall term/semester enrollment must occur prior to December 1st; Spring term/semester enrollment must occur prior to May 1st. Graduation requirements met: Elective requirement for graduation.

Advanced Honors English 12 is a weighted grades course designed for general and college prep students in grade 12. This course will engage students in learning the principles, processes, skills and techniques of high quality communication in the English language. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to communicate in English. Students will be engaged in learning, applying and mastering advanced skills of reading, writing, speaking and listening. In addition, students will learn and practice advanced skills in finding, analyzing and evaluating a variety of information resources in English. Students will work on frequent and varied writing assignments with a strong focus on vocabulary growth, the proper use of grammar and correct spelling, and mastery of the writing skills necessary for success in passing college entrance exams and for success in college or university work. Students will read, analyze and evaluate expository works with an emphasis on literature and will work on most writing, reading and research assignments outside of class time. Students will also read non-fiction books, articles, essays, poems, short stories, etc. Students will also be fully engaged in learning and mastering the California State content standards in English-Language Arts (district-adopted core content standards).

CBEDS: 9106

English 10B is a one-term course designed for general and college prep students in grade 10. This course will engage students in learning the principles, processes, skills and techniques of high quality communication in the English language. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to communicate in English. Students will be engaged in learning, applying and mastering the fundamental English skills of reading, writing, speaking and listening. In addition, students will learn and practice the basic skills of finding, analyzing and evaluating a variety of information resources in English. Students will work on frequent and varied writing assignments with a strong focus on vocabulary growth and the proper use of grammar and correct spelling. Students will read, analyze and evaluate literary works with an emphasis on understanding plot, characters and setting, and will work on some reading and research assignments outside of class time. Students will also read non-fiction books, articles, essays, poems, short stories, etc. Students will be fully engaged in learning and mastering the California State content standards in English-Language Arts (district-adopted core content standards).

Other course information: Prerequisites: None. Graduation requirements met: 10th Grade English requirement.

English/ English Language Development (ELD)**Course Title:** English 10C**Transcript/Report Card Title:** English 10C**Course Id:** CE2207**CBEDS:** 9106

English 10C is a course designed for general and college prep students in grade 10. This course will engage students in learning the same English communications standards, principles, processes and skills as English 10 but with a much heavier emphasis on high-quality writing skills and the literary analysis skills that are required for success in college and university studies. Students will be engaged in reading, analyzing and evaluating literary and non-fiction books, articles, essays, poems, and short stories that are more challenging and rigorous, with a strong emphasis on analyzing the writers' techniques with theme, symbolism, figurative language and point-of-view. Students will also be engaged in completing research and writing assignments that are much more rigorous and comprehensive. The writing focus will be on the essay form with an emphasis on a thesis statement, transitions, sentence variety and the use of supporting evidence. In addition, because this is an Advanced course, students will do extensive writing, reading and research work outside of class time.

Other course information: Prerequisites: Satisfactory completion of English 9 or Advanced English 9 with a grade of C or better. Graduation requirements met: 10th-grade English requirement.

English 11/12 Creative Writing is a course designed for general students in grades 11 or 12 who need extra support with their English writing skills. This course will engage students in learning the same English communications standards, principles, processes and skills as English 11 or 12 but with a much heavier emphasis on guided practice and tutorial support as they improve their writing skills so that they can be successful in community college work and/or in well-paying jobs in the workforce. Students will work on an individual contract basis with their teachers and will complete a variety of writing assignments on a range of literary topics. Students will be engaged in reading, analyzing and evaluating a variety of literary and non-fiction books, articles, essays, poems, and short stories with extra teacher support. Students will also complete extra writing assignments with more teacher guidance and tutorial help, and a much stronger emphasis on vocabulary growth, grammar improvement and correct spelling, and students will be able to choose between writing assignments in poetry, short stories, personal essays, novels and screen plays.

Other course information: Prerequisites: None. Graduation requirements met: 11th or 12th-grade English requirement.

Expository Reading and Writing is a course designed for general and college prep students in grade 11 or 12. This course engages students in completing 14 major assignments. Each assignment is composed of a sequence of integrated reading and writing experiences that take from one to three weeks to complete. An assignment template organizes the assignments, which move from pre-reading activities, through reading and post-reading activities, to formal writing assignments. Along the way, students learn to make predictions about texts, analyze both content and rhetorical structures, and properly use materials from the texts they read to support their own written arguments. This course is sponsored by the University of California and some of the topics include: Going for the Look, Rhetoric of the Op-Ed Page, Juvenile Justice and the Politics of Food. Students will be engaged in learning, applying and mastering higher level English skills of reading, writing, speaking and listening. In addition, students will learn and practice the basic skills of finding, analyzing and evaluating a variety of information resources in English. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to communicate in English. Students will be fully engaged in learning and mastering the California State content standards in English-Language Arts (district-adopted core content standards).

Other course information: Prerequisites: Completion of English 11 or English 11 Honors with a grade of C or better; or satisfactory completion of English 11 Extra Support or English 11 Extra Language Support with a grade of B or better and "proficient" level scores on the California Standards Test in English-Language Arts, and/or teacher recommendation. Graduation requirements met: 11th or 12th grade English requirement.

CSU/UC a-g requirements met:**CSU/UC "G" requirement****NCAA eligibility requirements met:****No****Course Title:** Honors Shakespeare**Transcript/Report Card Title:** Shakespeare (H)**Course Id:** CE4028**CBEDS:** 9108

Honors Shakespeare is a course that surveys Shakespeare's work, with a sampling of early and later works from each of the genres (Comedies, Tragedies, Histories and Romances); as well as the Sonnets. Students will work daily in each of the Four Domains of English (Reading, Writing, Speaking, Listening). Students write frequently for a variety of formal and informal purposes; and will master the rhetorical devices embedded in Shakespeare's plays and Sonnets. Students will use Shakespearean text to think critically, state and advocate critical positions; sharpen their ability to recognize and use metaphor and figurative language; immerse themselves in a detailed examination of Elizabethan Theater and performance style; and will discover how Shakespeare has profoundly affected our ideas about humor, gender, love, war, dramatic art and the English language itself. The plays will be paired with appropriate film offerings where possible. Students will see a live Shakespeare production in the Spring Semester.

American History & Film American History & Film is a semester long elective history course open to all 11 1h and 12th graders to enhance their knowledge of U.S. History. This course is a study of various films and documentaries with content that relates to certain aspects of American History. The purpose of the course is to examine these films in an attempt to discern fact from fiction. The course will look at media interpretation of 10 major episodes in US History: Colonization to Revolution, Westward Movement and the Building of America, The Civil War, The World at War and The Roaring '20's, The Great Depression of the 1930's, World War II, Cold War, The Race For Space and It's Effects, The Civil Rights Movement, Vietnam War and the protest of the 1960's, and American Foreign & Domestic Policies of the latter 20th Century. The course is designed to supplement required course material found in the California Academic Standards as well as present other insightful information and historical events. The course will make use of technology (Internet), current events and classical film to present historical fact and fiction to all students for critique.

Other course information: Passing grade in U.S. History of "C" or better OR concurrent enrollment in US History. Graduation requirements met: Elective Credits

Course Title: AP European History**Transcript/Report Card Title:** AP Euro Hist**Course Id:** CH2110**CBEDS:** 9195

AP European History is a weighted grades course designed for general and college prep students in grades 10 who will be taking the European History Advanced Placement test. This course follows the national AP European History framework and focuses on developing students' abilities to think conceptually about European history from approximately 1450 to the present and to apply historical thinking skills as they learn about the past. This course explores five themes of equal importance: Interaction of Europe and the World; Poverty and Prosperity; Objective Knowledge and Subjective Visions; States and Other Institutions of Power; and the Individual and Society. These themes provide areas of historical inquiry for investigation throughout the course. AP European History also requires students to reason historically about continuity and change over time, and to make comparisons among various historical developments in different times and places. This course also builds an understanding of cultural, institutional, and technological themes that have changed European societies and nations, and it will engage students in learning the principles, processes, skills and techniques of the study of European History and how it relates to their present-day lives. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to understand human relationships and the forces of history in our global society and economy. Students will develop conceptual knowledge, research and writing skills, and higher levels of thinking including the processes of framing an inquiry, selecting relevant sources and organizing evidence in support of a thesis. Students will also do extensive research analysis with primary and secondary sources of information, and they will build on their skills in logic, analytical reading, critical thinking and high-level expository writing. A successful performance on the Advanced Placement Exam will enable students to obtain college credit in European History at selected colleges and universities. Students will be fully engaged in learning and mastering the California State content standards in History/Social Studies (district-adopted core content standards).

This course will engage students in learning the principles, processes, skills and techniques of the study of the history of religion and how it relates to their present-day lives. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to understand human relationships and the forces of religion in history. This course will review the various types of religions - polytheistic, monotheistic and philosophical - as well as various ways to study religion. Students will analyze the origins and tenets of world religions - Judaism, Christianity, Islam, Buddhism, Hinduism, Jainism, Taoism and Confucianism. The focus of this course will be on a study of the impact of these and other religions on their countries of origin and on past and current world events and relationships. Students will analyze the role of religion in the transformation of the Chinese culture, India's caste system, the Native American culture, the expansion of Western Europe, and the complications in the Middle East today. Students will also explore theocracies in such nations as Iran and will compare them to nations with multiple religions such as the United States. Students will study the history of religion in the U.S. and will analyze how religions in the U.S. helped to shape American government and institutions. Students will also explore such vital topics as religious diversity and tolerance.

Other course information: Prerequisites: Satisfactory completion of or concurrent enrollment in World History. Graduation requirements met: Elective credits requirement.

Course Title: Honors American Government**Transcript/Report Card Title:** Amer Govt (H)**Course Id:** CH4008**CBEDS:** 9174

Honors American Government is a weighted grades course designed for general and college prep students in grade 12. This course will engage students in learning more in-depth and advanced principles, processes, skills and techniques of the study of America Government and Economics and how they relate to their present-day lives. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to understand human relationships and the forces and trends of our American Government and Economy. In one portion of this course students will be engaged in understanding of historical roots of their civil rights, liberties and responsibilities and the knowledge and skills necessary to become well-informed and active citizens in our United States democratic republic and government at all levels: local, state and federal. In another portion of this course students will be engaged in learning all about our unique American economy, how it works and how it directly impacts their personal finances. Students will learn and practice the fundamentals of prudent financial decision-making: earnings, taxes, savings, investments, borrowing and credit. Students will also analyze the larger functions of the American economy as a whole: Economic Theory; Allocation of Resources; Markets and Pricing Theory; Labor Markets and Collective Bargaining; National Income Accounting; Governmental influence upon the Economy including Fiscal and Monetary Policy; and International Trade. Students in this course will be required to do more advanced reading analysis, more extensive research and more expository writing. Students will be fully engaged in learning and mastering the California State content standards in History/Social Studies (district-adopted core content standards).

Other course information: Prerequisites: Satisfactory completion of United States History or AP United States History. This is a California State required course for all students. Graduation requirements met: 12th-grade History/Social Studies requirement.

Personal Psychology is a one-term elective course designed for general and college prep students in grades 11 or 12. Students will be engaged in learning the principles, processes and skills necessary to understand and analyze the major schools of thought in human psychology. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to understand human relationships and the psychological forces that influence those relationships. Students will learn how human personalities are developed and how our personalities influence our behaviors and vice versa. Students will work with personality inventories, self-analysis tools and research studies regarding psychological profiles, normal behavior and abnormal behavior. Students will conduct their own investigative research into selected topics about human psychology and behavior. This course is designed to complement and work together with the Social Psychology course.

Other course information: Prerequisites: None. Graduation requirements met: Elective credits requirement.

Social Psychology is an elective course designed for general and college prep students in grades 11 or 12. Students will be engaged in learning the principles, processes and skills necessary to understand and analyze the psychological effects of social systems on individual people and small groups. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to understand human relationships and the forces and trends in the social psychology of America. Students will learn how society molds our personality, controls our behavior and the systems society has established to make us what we are, including cultural practices such as marriage and dating rituals, socially deviant behaviors, prejudice, and social trends such as fads and fashions. This course is designed to complement and work together with the Personal Psychology course.

Course Title: World Geography

Course Id: CH1021

Transcript/Report Card Title: World Geography

CBEDS: 9171

World Geography is a course designed for general and college prep students in grade 9. This course will engage students in learning the principles, processes, skills and techniques of the study of World Geography and how it relates to their present-day lives. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to understand human relationships and the forces of geography in our global society and economy. Students will be engaged in learning, applying and mastering the major topics in physical geography: the forms and structures of mountains, rivers, oceans, volcanoes, deserts, etc.; climate and weather; earthquakes; tsunamis; and the major geographic features of planet Earth and how they impact the lives of human beings. Students will also be engaged in learning, applying and mastering the major topics in social geography and in studying the cultural, environmental, historical and political features of how people live in the eight major regions of the world. Students will also investigate the physical and social geography of the Tri-County region in which they live. Students will be fully engaged in learning and mastering the California State Content Standards in Geography (district-adopted core content standards) in order to complete this graduation requirement.

Other course information: Prerequisites: None. Graduation requirements met: 9th-grade History/Social Studies requirement.

Course Title: AP Calculus AB

Transcript/Report Card Title: AP CalculusAB

Course Id: CM4108

CBEDS: 9268

AP Calculus AB is a course designed for college prep students in grades 11 or 12 and it prepares them to take the Calculus AB Advanced Placement test. This course will engage students in learning the principles, processes, skills and techniques of Calculus AB or the first level of college or university Calculus. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in Calculus. Students will work with the formal definitions and graphical interpretations of limits and functions, derivatives, differential equations, integrals and inverse trigonometric functions. Satisfactory completion of Honors Calculus is critical for future college or university work in engineering, advanced sciences, advanced computer applications, etc. Students will be fully engaged in learning and mastering the California State content standards in Mathematics (district-adopted core content standards).

Other course information: Prerequisites: Completion of Pre-Calculus with a grade of C or better. Graduation requirements met: Math requirement.

Course Title: Integrated Math 1

Transcript/Report Card Title: Int Math 1

Course Id: CM1010

CBEDS: 9241

Integrated Math 1 is a course designed for general and college prep students in grades 9, 10, 11 or 12. Integrated Math 1 is the first course in a three course sequence including Integrated Math 1, 2 and 3. This course satisfies the California Common Core State Standards for Integrated Math 1. This course will engage students in learning the principles, processes, skills and techniques of the first level of Algebra and Geometry. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply Algebraic and Geometric concepts and problem-solving skills. The fundamental purpose of this course is to formalize and extend the mathematics that students learned in the middle grades. Specifically, Integrated Math 1 builds and strengthens students' conceptual knowledge of functions, linear functions, basic exponential functions, sequences, equations, inequalities, systems of linear equations and inequalities, one variable descriptive statistics, correlation and residuals, analyzing categorical data, mathematical modeling, and both transformational and coordinate geometry. Students will be engaged in learning, applying and the mastering symbolic reasoning and calculations that are fundamental to mathematics and the sciences. Students who successfully complete this course with a C or better will be prepared to move to Integrated Math 2.

Other course information: Prerequisites: Completion of 8th-grade CCSS Math with a grade of C or better, or completion of the Intoduction to Integrated course with a passing grade or teacher recommendation. Graduation requirements met: Math requirement.

CSU/UC a-g requirements met:
CSU/UC "C" requirement

Mathematics**Course Title:** Integrated Math 2**Transcript/Report Card Title:** Int Math 2**Course Id:** CM2010**CBEDS:** 9242

Integrated Math 2 is the second course in the three course sequence of Integrated Math 1, 2 and 3, and it is designed for general and college prep students in grades 10, 11 or 12. This course satisfies the California Common Core State Standards for Integrated Math 2. This course will engage students in learning the principles, processes, skills and techniques of the second level of Algebra and Geometry. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply Algebraic and Geometric concepts and problem-solving skills. The focus of this course is to extend students' knowledge of functions from linear and exponential functions to quadratic functions, exponents to rational exponents, number systems to include irrational and complex numbers, and probability to include mutually exclusive events, independent events and conditional probability. Students will write geometric proofs and build a formal understanding of similarity using dilations and proportional reasoning and use similarity to understand right triangle trigonometry. Students will be engaged in learning, applying and the mastering symbolic reasoning and calculations that are fundamental to mathematics and the sciences. Students who successfully complete this course with a C or better will be prepared to move to Integrated Math 3.

Other course information: Prerequisites: Completion of Integrated Math 1 with a grade of C or better. Graduation requirements met: Math requirement.

CSU/UC a-g requirements met:**CSU/UC "C" requirement****NCAA eligibility requirements met:****Yes****Course Title:** Integrated Math 3**Transcript/Report Card Title:** Int Math 3**Course Id:** CM3010**CBEDS:** 9243

Integrated Math 3 is the third course in the three course sequence of Integrated Math 1, 2 and 3, and it is designed for general and college prep students in grades 10, 11 or 12. This course satisfies the California Common Core State Standards for Integrated Math 3. This course will engage students in learning the principles, processes, skills and techniques of the Algebra 2 and Trigonometry. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply advanced Algebraic, Trigonometric and Statistical concepts and problem-solving skills. In Integrated Math 3 students pull together the concepts they learned in Integrated Math 1 and 2. Students expand their knowledge of statistics and probability to make inferences and draw conclusions from data; students will also expand their use and applications of rational, radical, logarithmic and polynomial functions; and students will learn trigonometry concepts that include the law of sines, law of cosines and radian measure. Students will be asked to model real-life situations extensively. Students will be engaged in learning, applying and the mastering symbolic reasoning and calculations that are fundamental to mathematics and the sciences. Students who successfully complete this course with a C or better will be prepared to move to Pre-Calculus and AP statistics.

Other course information: Prerequisites: Completion of Integrated Math 2 with a grade of C or better. Graduation requirements met: Math requirement.

CSU/UC a-g requirements met:**CSU/UC "C" requirement****NCAA eligibility requirements met:****Yes****Course Title:** Intro to Integrated Math**Transcript/Report Card Title:** Int to Int Math**Course Id:** CM0810**CBEDS:** 9245

Intro to Integrated Math is a course designed to help students develop and enhance their conceptual knowledge and procedural skills in mathematics in order to be adequately prepared for a transition into the Integrated Math 1 course. General students in grades 9 who are in need of a slower pace and extra assistance in mastering procedural fluency in arithmetic and mathematics and a stronger conceptual foundation will work with manipulatives, graphs, diagrams and real world models to better understand numbers and math concepts numerically, graphically, algebraically and verbally. Students will be engaged in working with solving problems with linear equations, problems with multi-step equations and problems that involve systems of equations both graphically and algebraically. Students will also work with functions and different representations of functions by analyzing two-dimensional and three-dimensional figures and distances, angles, similarities, congruities and applications of the Pythagorean Theorem. Students will also work with real world applications of mathematics that include algebraic, geometric and statistical concepts. Students will learn the principles, processes, skills and techniques of the first level of Algebra and Geometry to formalize and extend the mathematics that students learned in the middle grades. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply Algebraic and Geometric concepts and problem-solving skills. Students will also learn and apply the Common Core State Standards in mathematics that are required for a successful transition into Integrated Math 1.

Other course information: Prerequisites: This course is strongly recommended for students who did not pass 8th grade CCSS Math with a grade of C or higher, for students who need extra help with mathematics skills. Students who pass with a grade of "C" or better will be ready to move on to Integrated Math 1. Graduation requirements met: Elective credit.

CSU/UC a-g requirements met:**No****NCAA eligibility requirements met:****No****Course Title:** Mathematics and Music**Transcript/Report Card Title:** Math and Music**Course Id:** CM5010**CBEDS:** 9295

Mathematics and Music is a course that is designed to engage students in practical musical applications of mathematics. Students who struggle with math will find new ways to understand and experience mathematical concepts, and students who do not struggle with math will deepen their existing understanding. As the course will take an historical overview, students will also gain a sense of cultural literacy as we study different cultures who studied mathematics in connection with music.

Course Title:	Pre-Calculus (H)	Course Id:	CM4008
Transcript/Report Card Title:	Pre-Calculus(H)	CBEDS:	9257

Pre-Calculus (H) is a weighted grades course designed for general and college prep students in grades 11 or 12. This course will engage students in learning the principles, processes, skills and techniques of more advanced levels of Trigonometry and Algebra. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply more advanced Trigonometric and Algebraic concepts and problem-solving skills. Students will be engaged in learning, applying and the mastering more advanced and trigonometric functions and calculations that are required for the study of Calculus and higher level sciences. Students will work with conic sections both analytically and geometrically, roots and poles of rational functions and their asymptotes and some introductory work with calculus. Satisfactory completion of Honors Pre-Calculus is critical for future work in Calculus and advanced science courses. Students will be fully engaged in learning and mastering the California State content standards in Mathematics (district-adopted core content standards).

Other course information: Prerequisites: Completion of Advanced Algebra 2 or Trigonometry and Advanced Algebra with a grade of C or better. Graduation requirements met: Math requirement.

Course Title:	Quantitative Reas Math Topics	Course Id:	CM4510
Transcript/Report Card Title:	QRAT Math	CBEDS:	9247

Quantitative Reas Math Topics course builds on algebraic foundations with a deductive reasoning lens to pave the way for higher mathematics topics. Patterning with discrete and continuous functions provides a platform for investigating invertible and noninvertible functions, parametric functions, linear programming, rational functions, higher degree polynomials and function composition. The course then extends these topics to examine matrices, complex numbers, discrete integrals, derivatives, function continuity, Rolle's theorem, and the Fundamental Theorem of Calculus. Throughout these topics, students develop math practices applicable to any area of mathematics, including numerical fluency and flexibility.

Other course information: Prerequisites: Completion of Integrated Math 3 with a grade of C or better. Graduation requirements met: Math requirement.

Course Title: Advanced Basketball**Transcript/Report Card Title:** Adv Basketball**Course Id:** CP5905**CBEDS:** 9316

Advanced Basketball Physical Education for Life is a series of optional courses designed for general and college prep students in grades 10, 11 or 12. These courses will engage students in learning the principles, processes, skills and techniques of Physical Education and Physical Fitness that are necessary for a healthy, active, positive and enjoyable life: Body Movement and Biomechanics in a variety of body movements and exercise, Physical Fitness and Preventative Health, Self-Discipline and Self-Responsibility, and Group Dynamics and Teamwork. All Physical Education courses are mixed classes of female and male students as required by federal and state laws and students will be fully engaged in learning the California and district-adopted standards in physical education.

Other course information: Prerequisites: Tenth grade students: Satisfactory completion of Physical Education Course 1 with a grade of A or B and a passing score on the Physical Fitness Test. Eleventh and twelfth grade students: Satisfactory completion of Physical Education Course 1 and Physical Education Course 2 with a passing grade. Note: Because Physical Education courses require active participation in class on a daily basis, students must actively participate at least two-thirds (2/3) of the time in a given semester/quarter in order to receive a passing grade. Graduation requirements met: Physical Education credit or elective credit.

Course Title: Gymnastics and Fitness**Transcript/Report Card Title:** GymnasticsFit**Course Id:** CP6005**CBEDS:** 9316

Gymnastics and Fitness Physical Education for Life is a series of optional courses designed for general and college prep students in grades 10, 11 or 12. These courses will engage students in learning the principles, processes, skills and techniques of Physical Education and Physical Fitness that are necessary for a healthy, active, positive and enjoyable life: Body Movement and Biomechanics in a variety of body movements and exercise, Physical Fitness and Preventative Health, Self-Discipline and Self-Responsibility, and Group Dynamics and Teamwork. All Physical Education courses are mixed classes of female and male students as required by federal and state laws and students will be fully engaged in learning the California and district-adopted standards in physical education.

Other course information: Prerequisites: Tenth grade students: Satisfactory completion of Physical Education Course 1 with a grade of A or B and a passing score on the Physical Fitness Test. Eleventh and twelfth grade students: Satisfactory completion of Physical Education Course 1 and Physical Education Course 2 with a passing grade. Note: Because Physical Education courses require active participation in class on a daily basis, students must actively participate at least two-thirds (2/3) of the time in a given semester/quarter in order to receive a passing grade. Graduation requirements met: Physical Education credit or elective credit.

Course Title: Physical Education Course 1**Course Id:** CP1005**Transcript/Report Card Title:** PE Course 1**CBEDS:** 9314

Physical Education Course 1 All 9th grade students must be enrolled in Physical Education Course 1. This course will engage students in learning the principles, processes, skills and techniques of the fundamental areas of Physical Education: Body Movement and Biomechanics in a variety of body movements and exercise, Physical Fitness and Preventative Health (including AIDS/HIV, etc.), Self-Discipline and Self-Responsibility, and Individual and Dual Activities. Students are assessed on their progress in activities selected from the following: Tennis, Ultimate Frisbee, Golf, Speedminton, Dance, Track & Field, Badminton, Circuit Training, Dry Land Aquatics, Paddle Ball and Frisbee Golf. In the spring semester students take part in the Fitness-gram test required by the State of California and the test results are reported to the California Department of Education. Students must successfully pass a minimum of five of the six required physical fitness tests or they must remain enrolled in physical education courses until they achieve this required state standard. All Physical Education courses are mixed classes of female and male students as required by federal and state laws and students will be fully engaged in learning the California and district-adopted standards in physical education.

Other course information: Prerequisites: None. This is a California State required course for graduation. Note: Because Physical Education courses require active participation in class on a daily basis, students must actively participate at least two-thirds (2/3) of the time in a given semester/quarter in order to receive a passing grade. Graduation requirements met: This course satisfies one year/one term (10 credits) of the California State and district graduation requirement of two years/terms of physical education.

CSU/UC a-g requirements met: No**NCAA eligibility requirements met:** No**Course Title:** Physical Education Course 2**Course Id:** CP5005**Transcript/Report Card Title:** PE Course 2**CBEDS:** 9315

Physical Education Course 2 is a course designed for general and college prep students in grades 10, 11 or 12. It is strongly recommended for students in grade 10. This course will engage students in learning the principles, processes, skills and techniques of Physical Education and Physical Fitness that are necessary for a healthy, active, positive and enjoyable life: Body Movement and Biomechanics in a variety of body movements and exercise, Physical Fitness and Preventative Health, Self-Discipline and Self-Responsibility, and Group Dynamics and Teamwork. Students will be assessed on their progress in activities selected from the following: Volleyball, Basketball, Soccer, Flag Football, Softball, Handball, and Self-Defense. All Physical Education courses are mixed classes of female and male students as required by federal and state laws and students will be fully engaged in learning the California and district-adopted standards in physical education.

Other course information: Prerequisites: Satisfactory completion of Physical Education Course 1. Note: Because Physical Education courses require active participation in class on a daily basis, students must actively participate at least two-thirds (2/3) of the time in a given semester/quarter in order to receive a passing grade. Graduation requirements met: This course satisfies the second required year/term (10 credits) of the California State and district graduation requirement of two years/terms (20 credits) of Physical Education.

Course Title:	Yoga and Fitness	Course Id:	CP5125
Transcript/Report Card Title:	Yoga/Fitness	CBEDS:	9316

Yoga and Fitness is a class designed for the student who is looking to increase his or her personal level of fitness or work on weight management without athletic involvement. This class is suited for students of all physical abilities -from those just beginning an exercise program to those at a higher level of fitness looking to maintain or increase their current physical condition. The class will be divided into two parts. First is cardiovascular conditioning for about 15 to 20 minutes. The second part of the class is the Yoga/Pilates conditioning portion of the class. This yoga practice entails poses taken from the Hath a yoga form and applied for muscle conditioning, flexibility, balance, and breathing control. Pilates exercises for Core strength will be included in the yoga practice.

Other course information: Graduation requirements met: This course satisfies the second required year/term (10 credits) of the California State and district graduation requirement of two years/terms (20 credits) of Physical Education.

Course Title: Adv Ag Bio-The Living Earth**Course Id:** CS1111**Transcript/Report Card Title:** Adv Ag Bio Eart**CBEDS:** 9400

Adv Ag Bio-The Living Earth is a course that explores biological and earth science concepts from a phenomenon-based approach through the lens of agriculture. The course will include career readiness and job preparations associated with the FFA & SAE. In this lab-based NGSS course, we will incorporate the performance expectations of life science and, where appropriate, Earth and space science to deepen student understanding of life on Earth, the interactions between the biotic and abiotic systems and its role in agriculture. Students will use the Science and Engineering Practices (SEP's) and Crosscutting Concepts (CCC's) to build their understanding of how the Earth's systems interact and influence living organisms and populations, and how these populations in turn influence Earth's systems to explain natural phenomena. Advanced Agriculture - The Living Earth will cover the same content as Agriculture - The Living Earth, but have an emphasis on the technical skills and writing needed for future Advanced Placement courses.

Other course information: Prerequisites: None Graduation requirements met: Life Science

CSU/UC a-g requirements met:**CSU/UC "D" requirement****NCAA eligibility requirements met:****Yes****Course Title:** Adv Ag Chem in the Earth Sys**Course Id:** CS2111**Transcript/Report Card Title:** Ad/Ag Chem Eart**CBEDS:** 9400

Adv Ag Chem in the Earth Sys is a course that integrates the chemistry based Physical Science Performance Expectations (PEs) and the Earth and Space Science Performance Expectations, allowing students to explore how chemical processes drive the Earth system. The course emphasizes the continued development of the Science and Engineering Practices (SEPs) and Cross Cutting Concepts (CCCs) through which students build off of their experiences and prior knowledge by reading, discussing, and evaluating a wide variety of text, interpreting real data sets used by the scientific community, and planning, carrying out, and communicating their findings from text-based and laboratory investigations to deepen their understanding of chemistry and its role in the Earth system. Upon completion of the course students will have explored the fundamentals of chemistry and essential roles that these processes play in Earth's solid geosphere, its liquid hydrosphere, and its gaseous atmosphere. Due to the co-curricular nature of FFA and SAE (Supervised Agricultural Experience) students will be required to participate in both FFA and SAE activities, both of which are graded components of the course. Advanced Agriculture - Chemistry in the Earth System will cover the same content as Agriculture - Chemistry in the Earth System, but have an emphasis on the technical skills and writing needed for future Advanced Placement courses.

Course Title: Anatomy and Physiology**Transcript/Report Card Title:** Anat & Physiol.**Course Id:** CS4106**CBEDS:** 9335

Anatomy and Physiology is a course designed for general and college prep students in grades 11 or 12. This course will engage students in learning advanced level principles, processes, skills and techniques in Anatomy and Physiology: Genetics, Human Body Structures and Systems, Physical Fitness, and Medical Research. Students will be engaged in scientific investigations as a frequent and important learning activity, and they will learn and apply critical thinking skills, inquiry processes, mathematics skills as they are applied in the sciences, laboratory operations and safety, and practical science information and skills that are used in everyday life. Students will also be fully engaged in learning and mastering the California State content standards in Science (district-adopted core content standards). Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in Anatomy and Physiology.

Other course information: Prerequisites: Completion of The Living Earth, and/or Chemistry in the Earth System with a grade of C or better. Graduation requirements met: Life Science or Third Year Science

CSU/UC a-g requirements met:**CSU/UC "D" requirement****NCAA eligibility requirements met:****Yes****Course Title:** AP Biology**Transcript/Report Card Title:** AP Biology**Course Id:** CS4108**CBEDS:** 9350

AP Biology is a weighted grades course designed for general and college prep students in grades 10, 11 or 12 who are taking the Biology Advanced Placement test. This course will engage students in learning advanced level principles, processes, skills and techniques in the Biological Sciences: Cell biology and fundamental life processes, RNA and DNA, Structures and Functions of Plants and Animal Organism Groups, Genetics, Ecology, Evolution, Physiology, Diseases, and Biogeochemical Cycles as designated by the AP Biology College Board curriculum guide and framework. Students will be engaged in scientific investigations as a frequent and important learning activity, and they will learn and apply critical thinking skills, inquiry processes, mathematics skills as they are applied in the sciences, laboratory operations and safety, and practical science information and skills that are used in everyday life. Students will also be fully engaged in learning and mastering the California State content standards in Science (district-adopted core content standards). Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in the Biological Sciences.

Science

Course Title: AP Physics 1**Transcript/Report Card Title:** AP Physics 1**Course Id:** CS4008**CBEDS:** 9345

AP Physics 1 is a course designed for general and college prep students in grades 11 or 12 who will be taking the AP Physics test. This course will engage students in more rapid learning of advanced level principles, processes, skills and techniques in the Physics. This course provides a systematic introduction to the main principles of physics and emphasizes the development of conceptual understanding and problem-solving ability using algebra and trigonometry, but rarely calculus. In most colleges, this is a one-year terminal course including a laboratory component and is not the usual preparation for more advanced physics and engineering courses. However, the AP Physics B course provides a foundation in physics for students in the life sciences, pre-medicine, and some applied sciences, as well as other fields not directly related to science. Students will be engaged in scientific investigations as a frequent and important learning activity, and laboratory work will focus on precise measurements of forces, motion, heat, electrical quantities, wave properties and astronomical distances. Students will learn and apply critical thinking skills, inquiry processes, mathematics skills as they are applied in the sciences, and practical science information and skills that are used in everyday life. Students will also be fully engaged in learning and mastering the California State content standards in Science (district-adopted core content standards). Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in Physics.

Other course information: Prerequisites: Completion Chemistry in the Earth System and/or Physics of the Universe with a grade of C or better and completion of, or concurrent enrollment in, Pre-Calculus. Graduation requirements met: Physical Science or Third Year Science

CSU/UC a-g requirements met:**CSU/UC "D" requirement / Honors****NCAA eligibility requirements met:****Yes****Course Title:** AP Physics 2**Transcript/Report Card Title:** AP Physics 2**Course Id:** CS4018**CBEDS:** 9344

AP Physics 2 is designed so students will develop a deep understanding of foundational principles of physics in classical mechanics and modern physics by applying these principles to complex physical situations that combine multiple aspects of physics rather than present concepts in isolation. Discuss, confer, and debate with classmates to explain a physical phenomenon investigated in class. Design and conduct inquiry-based laboratory investigations to solve problems through first-hand observations, data collection, analysis and interpretation.

Other course information: Prerequisites: Completion of AP Physics 1 with a C or better. Graduation requirements: Third year science.

CSU/UC a-g requirements met:**CSU/UC "D" requirement / Honors****NCAA eligibility requirements met:****No****Course Title:** Biology 2 (H)**Transcript/Report Card Title:** Biology 2 (H)**Course Id:** CS4208**CBEDS:** 9324

Biology 2 (H) is a weighted course designed for general and college prep students in grades 10, 11, or 12 who are planning and preparing to take Honors Biology-Advanced Placement (AP). This course will engage students in learning advanced level and much more in-depth knowledge of the principles, processes, skills and techniques in the Biological Sciences: Cell biology and fundamental life processes, RNA and DNA, Genetics, Ecology, Evolution, Physiology, Plant and Animal Diseases, and Biogeochemical Cycles. Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in the Biological Sciences. Students will be engaged in learning, applying and the mastering the scientific method, mathematics as they are applied in the sciences, laboratory operations and safety, and practical science information and skills that are used in everyday life. Students will be fully engaged in learning and mastering the California State content standards in Science (district-adopted core content standards).

Other course information: Prerequisites: Completion of Integrated Math 1 and The Living Earth. Graduation requirements met: This course satisfies one year (10 credits) of the district's three year (30 credits) Science Requirement. Life Science or Third Year Science.

Course Title:	Chemistry in the Community	Course Id:	CS3106
Transcript/Report Card Title:	Chem in Commun.	CBEDS:	9325

Chemistry in the Community is a course designed for general and college prep students in grades 10, 11 or 12. This course will engage students in learning the principles, processes, skills and techniques in the Chemistry as they are manifested in everyday life in our local communities: The use of chemicals for industrial and agricultural businesses and service industries, in water treatment processes, in the building trades, and in the context of local issues such as air pollution, ground water pollution, etc. Students will be engaged in scientific investigations as a frequent and important learning activity, and they will learn and apply critical thinking skills, inquiry processes, mathematics skills as they are applied in the sciences, laboratory operations and safety, and practical science information and skills that are used in everyday life. Students will also be fully engaged in learning and mastering the California State content standards in Science (district-adopted core content standards). Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in Chemistry. This course serves as an excellent bridge to prepare students for the more advanced levels of Chemistry.

Other course information: Prerequisites: Completion of Biology and Algebra 1 with a grade of C or better. Graduation requirements met: This course satisfies one year (10 credits) of the district's three year (30 credits) Science Requirement. This course also satisfies the one year requirement for physical science.

Course Title:	Forensic Science CSI	Course Id:	CS5405
Transcript/Report Card Title:	ForensicSciCSI	CBEDS:	9359

Forensic Science CSI is a for general and college prep students in grades 11 or 12. This course will engage students in learning the principles, processes, skills and techniques in the use of all of the sciences (Physics, Chemistry, Biology and Earth Science) in the study of crime scene analysis or criminalistics. Students will be engaged in learning and applying their skills in precise measurement, careful and precise observations and documentation, chemical and physical analyses, in-depth lab work and research, logical thinking and problem-solving, and technical writing. Students will be engaged in scientific investigations as a frequent and important learning activity, and laboratory work will focus on precise measurements of physical, biological and chemical evidence. Students will learn and apply critical thinking skills, inquiry processes, mathematics skills as they are applied in the sciences, and practical science information and skills that are used in everyday life. Students will also be fully engaged in learning and mastering the California State content standards in Science (district-adopted core content standards). Future success for ALL students in the workforce, in college and university studies, and in adult life strongly depends on their ability to apply concepts and problem-solving skills in Forensics.

Other course information: Prerequisites: Completion of one life science course and one physical science course with a grade of C or better in both courses. Graduation requirements met: Third Year Science.

Course Title:	Honors Chem in the Earth Sys	Course Id:	CS2018
Transcript/Report Card Title:	Chem Earth (H)	CBEDS:	9332

Honors Chem in the Earth Sys is a course integrates the chemistry based Physical Science Performance Expectations (PEs) and the Earth and Space Science Performance Expectations. allowing students to explore how chemical processes drive the Earth system. The course emphasizes the continued development of the Science and Engineering Practices (SEPs) and Cross Cutting Concepts (CCCs) through which students build off of their experiences and prior knowledge by reading, discussing, and evaluating a wide variety of text, interpreting real data sets used by the scientific community, and planning, carrying out, and communicating their findings from text-based and laboratory investigations to deepen their understanding of chemistry and its role in the Earth system. Upon completion of the course students will have explored the fundamentals of chemistry and essential roles that these processes play in Earth's solid geosphere, its liquid hydrosphere, and its gaseous atmosphere. Honors Chemistry in the Earth System will have an emphasis on the technical skills and writing needed for future Advanced Placement courses.

Course Title: Medical Biology**Course Id:** CS2016**Transcript/Report Card Title:** Medical Biology**CBEDS:** 9335

Medical Biology the first course in the Health Careers pathway, consists of curriculum that relates to health, human systems and the health professions. The curriculum, resources and standards alignment is modeled after the Health and Science Pipeline Initiative (HASPI) which a collaborative project between Middle Schools, High Schools and Universities. Students will be engaged in learning the principles, processes and specific nomenclature of medical terms and their definitions as they are used in Medical Biology. Students will complete extensive units and assignments on Medical Biology which will include labs, field studies, research, college level writing assignments and investigations that require high levels of critical thinking, appropriate uses of the scientific method, problem-solving, teamwork, innovative and imaginative thinking, and high quality learn-to-learn skills. Students will be expected to maintain the professional ethics, behaviors and attitudes required for work in jobs in medical careers.

Other course information: Prerequisites: Satisfactory completion of IPS with a grade of C or better Graduation requirements met: This course satisfies one year (10 credits) of the district's three year (30 credits) Science Requirement. This course also satisfies the one year requirement for life science.

CSU/UC a-g requirements met:**CSU/UC "D" requirement****NCAA eligibility requirements met:****No****Course Title:** Physics of the Universe**Course Id:** CS2020**Transcript/Report Card Title:** Physics of Univ**CBEDS:** 9333

Physics of the Universe is a laboratory course that addresses the relationships of physics in the universe. Emphasis is on observing phenomena, gathering and interpreting data, developing models, discovering graphical and mathematical relationships, and engineering and refining solutions to realistic problem scenarios. Throughout the course students build off of their experiences and prior knowledge by reading, discussing, and evaluating a wide variety of text interpreting real data sets used by the scientific community. Students also plan and carry out investigations, and communicate their findings from text-based and laboratory investigations. Upon completion of the course students will have explored the fundamentals of physics and essential roles that these concepts play in the universe.

The Human Body:Applied Biology is a course designed for those students who are interested in the health and/or medical sciences. Students will extend their biological knowledge and understanding, and will focus on the structure and function of the cells, tissues, and organs of the human body. Students will utilize Case Studies to prompt the learning of new information, and will apply that knowledge to solve the Case Studies. Gross anatomy is examined, as well as those physiological structures supporting the body systems. Health issues, past and present will be explored and discussed. Exercise physiology and the impact of fitness on the human body will also be studied. Investigation of the comparative anatomy of humans and other organisms will be conducted. Students will need to have a basic understanding of Biology, access to a computer, and basic computer skills.

Course Title:	AVID 10	Course Id:	CN2001
Transcript/Report Card Title:	AVID 10	CBEDS:	9211

AVID 10 is a pre-college support program for students completing university admissions requirements. The AVID program is designed specifically for students who may be among the first students in a family to attend a four- year college or university. AVID focuses on student skills critical for success at the college level: reading, writing, inquiry and collaborative skills. AVID also helps students' understandings of colleges and careers through college field trips, guest speakers from northern California colleges and universities, and research projects. AVID students also receive tutoring to support their learning in other courses they are taking. Students will also do career research and exploration and college test preparation (PLAN/PSAT and ACT/SAT). In the senior seminar students are guided through the application process for colleges, completing the FAFSA information and completing applications for college scholarships.

Other course information: Prerequisite: Students in the AVID Program must be highly motivated and committed to achieving success. Students must also have the approval of the AVID Program Coordinator to enroll.

Business Math is a course designed for general and college prep students in grades 10, 11 or 12. This course will engage students in learning how to use the principles, processes and practices of business mathematics to manage and deal with their money and personal finances. Students will learn how to invest, how to make their money grow, how to use a checking account, ATMs, and credit cards, and how to deal with taxes, unemployment insurance, life insurance, vehicle insurance, and renters and homeowner's insurance. Students will also learn the math principles used in small businesses and the language of business mathematics in such areas as the stock market, bonds market, commodities investing, inventory management, supply chain processes, fraud prevention processes, etc. Students will also manage their own investment portfolio and they will learn the principles and practices of wealth management. Students who would like to become rich through effective money management should take this course.

Other course information: Prerequisites: None. It is strongly recommended that students have a minimum of "C" grades in their mathematics courses. Graduation requirements met: Elective credit.

CSU/UC a-g requirements met: No**NCAA eligibility requirements met:** No**Course Title:** Career Choices**Transcript/Report Card Title:** Career Choices**Course Id:** CN2011**CBEDS:** 9220

Career Choices is a course designed to help students develop a 10-year education and career plan. In the process of developing a comprehensive 10-year plan; students learn important strategies and formulas for decision-making processes that can be used when making any life defining decisions. Information and data discovered throughout this course as students continue on a path to develop their quantitative and meaningful 10-year plans. In order to make these 10-year plans quantitative they will put together action plans that are measurable, and through the completion of the career choices curriculum, this individualized plan will be a step-by-step process to systematically tackle issues and topics to develop deeper self-knowledge in order to make the plan meaningful.

Other course information: Prerequisites: None. Graduation requirements met: Elective Credits

AP Studio Art: 2-D is a weighted grades course designed for general and college prep students in grades 10, 11 or 12 who intend to pursue careers in art. This course will engage students in advanced professional level applications of the principles, processes and techniques in all of the major areas of fine arts (painting, drawing, sculpture, print-making, photography, etc.). Students will engage in applied, hands-on art projects in drawing and composition, water color paintings, acrylic paintings, print-making, photography, etc. which will be included in their own personal art portfolios. These portfolios will be evaluated by secondary and college art teachers and they must meet the Advanced Placement requirements and the professional standards for formal art shows. Students must be self-motivated and able to work independently to create an original collection of artistic pieces that are tied to a common theme. Student portfolios will be used for college/university admissions applications by students who intend to pursue art majors and/or by students who intend to enter directly into careers in art. The AP Exam consists of a portfolio of 29 pieces of art which will be submitted to the College Board for possible college credit. Students must pay the AP Exam registration fee.

Other course information: Prerequisites: Satisfactory completion of Intermediate Art or Intermediate Drawing. Graduation requirements met: Visual and Performing Arts.

Art History is a course designed for general and college prep students in grades 10, 11 or 12. This course will engage students in exploring a chronological survey of Western Art and its origins and traditions. Students will start with the prehistoric age and the work of ancient artists and they will follow a continuum of the development of art up through modern art and post-modern art. Students will examine and analyze the historical trends and movements that influenced artists from ancient times through the present day and the expressions of art from various cultures and in exchanges between cultures. Students will investigate all of these trends and art history topics through reading and through the use of slides, films, videos, field trips and art projects. Special attention will be given to the development of the skills and knowledge required for the written and oral interpretations of art. Students will also work with studio projects to explore historic art media and methods as they are manifested in the creative process.

Other course information: Prerequisites: Satisfactory completion of a beginning level art course with a grade of C or better and instructor approval. Some experience in drawing and digital art is also strongly recommended. Graduation requirements met: Visual and Performing Arts.
